

FRANCE'S RESEARCH TAX CREDIT

BENEFITS AND ADVANTAGES
FOR YOUR COMPANY

KEY INFO IN

10
POINTS

1

▶ GENEREROUS RATE

France's research tax credit covers **30% of all R&D expenses** up to €100 million, and 5% above this threshold. Salaries for research staff are wholly integrated, plus 50% of R&D operating costs and 75% of investments in R&D operations.

2

▶ OPEN TO ALL COMPANIES

All companies incurring R&D expenses are eligible, **regardless of their size, business sector and nationality.**

3

▶ NUMEROUS TAX CREDIT RECIPIENTS

16,000 companies received France's research tax credit in 2013.

4

▶ LARGE TAX CREDIT BASE

The research tax credit base covers not only all R&D spending (salaries, social security contributions, amortization and depreciation allowances, operating costs, subcontracting, patents and monitoring, etc.) **but also innovation expenses incurred by SMEs,** at a rate of 20% (up to €400,000 a year).

5

▶ A TAILORED TAX INCENTIVE

All expenditure contracted out to public-sector bodies is **double-counted**, thereby effectively doubling the research tax credit (up to €12 million). Salaries paid to **junior final-year doctoral and post-doctoral research** personnel on their first permanent contract are **quadruple-counted** for two years.

6

▶ POSSIBLE IMMEDIATE RESEARCH TAX CREDIT REBATE

SMEs, innovative new companies (*jeunes entreprises innovantes* – JEIs), startups and ailing companies may ask for an **immediate research tax credit rebate**. Bpifrance, France's public investment bank, offers a **pre-financing solution covering 80%** of expected eligible expenses (for companies based in France for more than three years, having previously received the research tax credit).

7

▶ LONG-TERM STABILITY GUARANTEED

The research tax credit and “innovative new companies” schemes have been fixed until 2017 at the earliest. Companies can also request a research tax credit advance ruling (*rescrit*) from Bpifrance or the French tax authorities, for example, to **secure the future of their investments** (tacit agreement can be assumed if no reply is received within three months).

8

▶ SIGNIFICANT TAX RELIEF

Total tax relief for research tax credit recipients amounted to more than €6 billion in 2013.

9

▶ CUMULATIVE BENEFITS WITH OTHER TAX INCENTIVES

Eligible companies can enjoy combine the benefits of the research tax credit with those of the “innovative new companies” scheme (*jeunes entreprises innovantes* – JEIs), which provides for corporate tax, local taxes and social security contributions over an eight-year period, as well as all other tax incentives (e.g. the CICE tax credit).

10

▶ INTERNATIONALLY ACKNOWLEDGED EFFECTIVENESS

The 9th *Baromètre européen de l'innovation* (European Innovation Funding Survey) ranked **France's research tax credit** as the **leading innovation funding measure** for European companies. (Alma Consulting Group, 2013) France is the country that offers the **most generous R&D tax treatment** for companies. (OECD Science, Technology and Industry Scoreboard, 2013)

France has the **lowest effective corporate tax rate in the world** (among the 10 countries surveyed) **for R&D operations**, taking into account differences in tax bases, depreciation allowances, tax exemptions and tax credits. (KPMG, Competitive Alternatives, 2014)
